Experience

Database programmer and analyst, New York

- We worked with a team of distinguished students to build the data base of the Islamic University
- Where we first wrote the user story Which represents the scenario that the student goes through to register at the university then the ER diagram and then Presentation
- Building the database and interface using Oracle APEX (Quick SQL)
- This project gained a lot of experience in the field of database analysis after we were supervised by senior engineers at the Islamic University in Gaza, represented by Mounir Al-Masry
- Carry out quality assurance tests to discover errors and optimize usability.
